Overview

Our Client, are looking for experienced Software Developers to join an established development team working on modern, production-level applications. This is a hands-on role suited to someone who is technically strong, comfortable working within a structured team environment, and confident collaborating with international developers. You'll be contributing to real-world applications, following best practices, and communicating clearly in English as part of a distributed team.

Key Responsibilities:

- Application Development – Build, maintain, and improve mobile applications using React Native, TypeScript, and modern frontend practices.
- State & Data Management – Work with React Native and Typescript to manage application state, data flows, and asynchronous logic efficiently.
- Team Collaboration – Collaborate closely with other developers, designers, and stakeholders, contributing to planning, reviews, and daily development workflows.
- Code Quality & Best Practices – Write clean, maintainable code, follow established coding standards, and participate in code reviews.

- Issue Resolution & Improvements – Debug issues, fix bugs, and continuously improve performance, stability, and user experience across applications.

Key Requirements:

- **Minimum 2+ years** of professional experience working as a Software Developer, with hands on experience in React Native, TypeScript, Redux and RxJS.
- **A degree or diploma** in Computer Science, Software Engineering, IT, or a related field, or equivalent practical experience.
- **Strong working knowledge of** Redux, RxJS, React Native and Typescript for state management and reactive programming.
- **Experience working within an existing development team** and structured codebase.
- **Strong problem-solving skills** with attention to detail and code quality.
- **Excellent written and spoken English**, with the ability to communicate clearly with international team members.
- Comfortable working remotely, managing tasks independently, and meeting deadlines.
- **Understanding of modern development workflows**, version control systems (Git), and collaborative tools.
- **A proactive mindset, willingness to learn, and ability to adapt** within a fast-moving development environment

Interested & Qualified Candidates should send an e-mail;

- Fill & attach the **Candidate Profile** ([Download](#))
- Attach their **CV**
- Place the **JOB Role/Title** in the **SUBJECT** of the email
- Send the e-mail to hr@mkssol.com

Do NOT send reminders or request for status updates, which will cause automatic disqualification. Once shortlisted, Viable candidates will be contacted and potential candidates will be saved in our database for future requirements.
